GLITTER  
4/28/02

TO WHOM IT MAY CONCERN:

Material safety data sheets have been developed for our glitter products. However, they are not required since our products meet the OSHA definition of an article:

"Article means a manufactured item: (i) Which is formed to a specific shape or design during manufacture; (ii) which has end use function (s) dependent in whole or in part upon its shape or design during end use; and (iii) which does not release, or otherwise result in exposure to a hazardous chemical, under normal conditions of use."

This information is being furnished to answer any questions that may arise about the safety of our products.

MATERIAL SAFETY DATA SHEET

May 1997
